| CAD/CAM Systems | Industrial Training | Placements**

# **What is Web Designing**

- **Web Design is a technique for designing website from the front end. It comprises of different areas such as graphic design, Photoshop Skills, Standard Code, Ready-to-use software and most important responsiveness.**
- **To become a web designer you need to learn Photoshop, HTML, CSS, JavaScript and responsive web design so as to code the different pages of the website.**
- **Web design encompasses many different skills and disciplines in the production and maintenance of websites.**

- **We can categorized Web Development in 2 categories-**
  - **Front-end development - for this we can use HTML, Cascading Style Sheet, or Javascript.**
  - **Back-end development - for this we can use java, php and .net programming languages.**

**Here in Web designing we focus on front end development**

- **Today, majority people are buying the products online, therefore every businessmen is building an E-commerce website in order to keep pace of their business and meet customer requirement. There are numerous web design company who offers various services such as web design & web development to help startups and Enterprise for boosting their business revenue.**

# **FUTURE SCOPE OF WEB DESIGNING**

- Web Designing is a promising career opportunity which displays immense scope for interested candidates. In India, one of the biggest industry, which provides a prospective scope for Web Designing as a career opportunity is the IT or the software industry.
- Web designers are required everywhere irrespective of the language you develop any website or web application or a Mobile App. i.e. If you develop any website, web application or Mobile App in any language (e.g. Java, PHP, .Net, Android etc.), web designers are required everywhere. Hence web designers will always have a promising career

- Clients interested in getting their online presence established are approaching the software giants to get their Web sites designed. Therefore, the software stalwarts require web designers.
- They also welcome Freshers who have sufficient knowledge and undergone training. This provides them with an excellent opportunity to learn the work
- Most organizations also recruit web designers for their internal projects which have a distinct flavor of their own as it provides the opportunity for Designers to interact with major company stakeholders who run these internal initiatives.
