WHAT IS JAVA??

Sun white paper defines Java as:

- **Simple and Powerful**

- **Safe**

- **Object Oriented**

- **Robust**

- **Architecture Neutral and Portable**

- **Interpreted and High Performance**

- **Threaded**

- **Dynamic**

Future Scope of Java Programmers

Following are some of the points that shows opportunities for Java Developers in India:

- **India's $150 billion IT services outsourcing industry is adapting to the changes that are fast setting in because of automation and higher adoption of digital technologies.**

- **People's Popularity of Programming Language index, which ranks languages according to popularity. It is based on tutorial searches, says Python, JavaScript, R, and Swift are gaining attraction in India though Java and PHP still retain the largest share of search.**

Future Scope of Java Programmers

- **There is one clear trend from the multiple surveys on the most widely used programming language worldwide: Java and JavaScript still rule the coding world.**

- **Government projects like Digital India and Demonetization surely will give rise to demand for Java Programmers in every company going digital.**
